

ROCWARE[®] x **zoom**

MEETING SPACE SOLUTIONS

Rocware has collaborated with Zoom to create a series of Rooms meeting solutions tailored to meet the diverse needs of businesses for office collaboration in different meeting spaces. These solutions can be flexibly matched and quickly deployed according to the size of the meeting room space. Combined with the pre-installed Zoom Rooms client, they help enterprise customers create a more efficient, convenient, and relaxed collaborative communication environment

Large Meeting Room

Medium Meeting Room

huddle & small room

15-30m² Space

Zoom is a conference software platform with nearly 200,000 corporate users worldwide. It can accommodate up to 1000 participants in a video conference simultaneously, providing high-quality video and audio effects, offering users a more authentic face-to-face communication experience. Additionally, Zoom supports participation in meetings through various devices such as computers, smartphones, or tablets, making it an excellent tool for remote communication and collaboration for businesses

Professional Audiovisual Experience

Created in collaboration between Zoom and Rocware, the Unified Solution offers flexible meeting room "Rooms" solutions tailored to different corporate meeting spaces. The solution integrates Zoom's capabilities in video conferencing, screen sharing, interactive whiteboards, and meeting management, along with Weihai's strengths in audio-video hardware devices. Together, they provide efficient and convenient remote communication and collaboration experiences for enterprise customers

High Integration

The solution boasts high integration, making installation and deployment extremely simple. The devices are integrated with AI audio-video algorithms, significantly reducing the costs of dedicated maintenance and management. With seamless collaboration between hardware and software, it maximizes the performance of audio-video hardware and collaboration platform services, providing users with efficient, stable remote meetings, and communication collaboration experiences.

huddle & small room solution

Independent Research and Development

Localized Audio and Video Technology

For 17 years since its establishment, Rocware has adhered to independent research, development and innovation, continuously invested in improvement, and fully mastered the core algorithm technology in the field of audio and video. The entire product line is independently controllable, safe, reliable, and highly competitive.

Own Factory

Complete Self-owned Supply Chain

Rocware has its own factory, it can independently complete part of the mold design and manufacturing, CNC processing, plastic injection molding and other basic material production. It also has an internationally advanced high-speed double-sided PCB SMT line, precision equipment assembly and testing line, to ensure product quality and stable supply.

800-416-1895

Well-developed After-sales Support System

Rocware has set up five major marketing centers around the world, with more than 30 after-sales service outlets. It provides 7*12 hour customer service telephone support, as well as various online and offline technical support and after-sales services to comprehensively ensure the user experience.
