

School Solution

It includes emergency help intercom, emergency broadcast, emergency command, IP phones, monitoring and control center communication system, and it can provide fast and effective services for all kinds of emergencies for the students, and help the education industry to improve the management efficiency.

The IP phones can be installed in the headmaster's office and the monitoring center as a command system to monitor and manage all intelligent security and communication terminals in the school. The emergency intercom and speaker can be installed in the corridor, schoolyard, guard room for emergencies. The monitoring center or police station will be notified if the alarm is triggered by an intruder.

POWERFUL FUNCTIONS

Alarm for Help

The teachers and students can use the alarm device calling to the nearest monitoring center for help once they meet robbery or personal injury.

Broadcasting

The monitoring center can shout to deter the intruder once they found abnormal cases. The administrator can use the office phone for notification broadcast.

Emergency Consultation (Meeting Mode)

Other parties like security guards and teachers can be invited to participate in the multi-party consultation for better communication.

Scheduled Broadcast

Scheduled broadcast as preset programs like music ringtones, class exercises and radio programs.

Access Control

The monitoring center can talk and confirm the visitor via the door phone and open the door remotely.

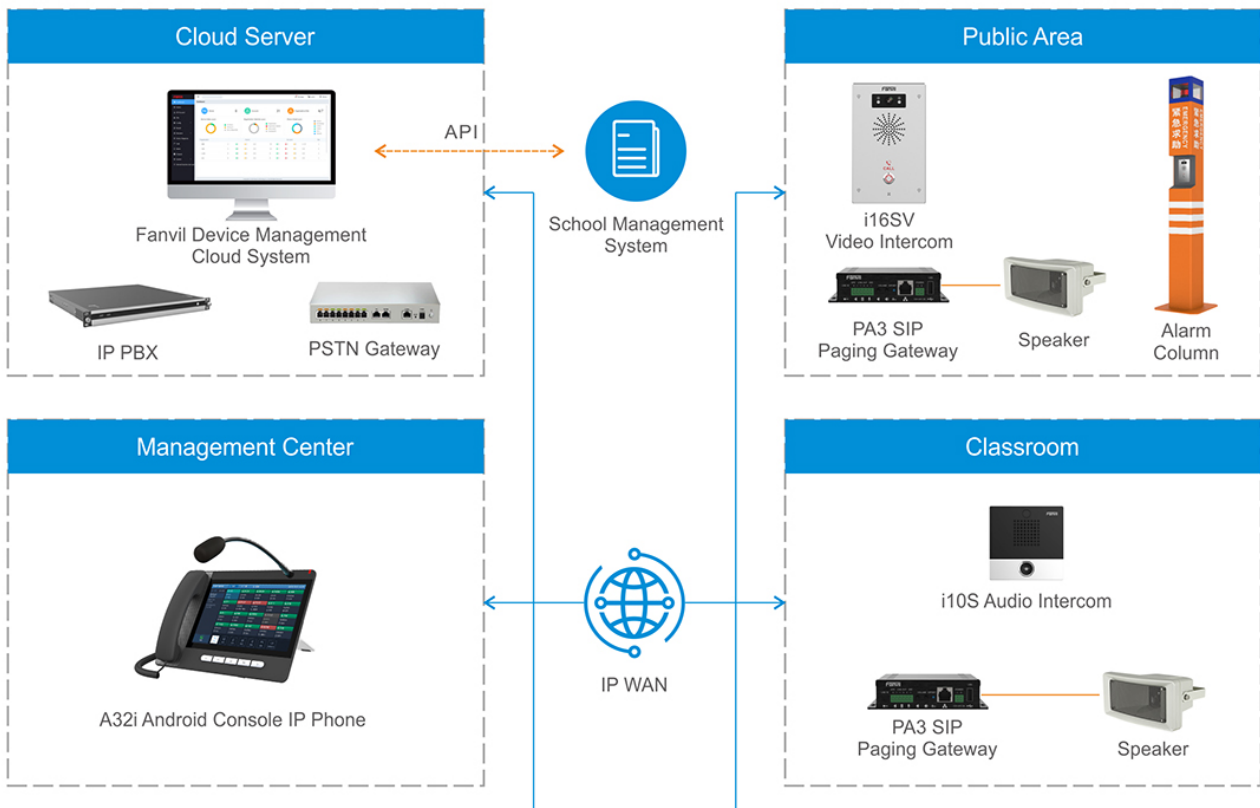

Intercom Assistance

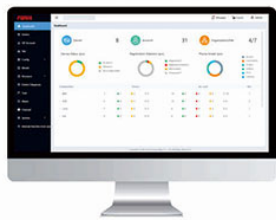

Teachers can use intercom to get efficient remote help if proper equipment failed in the classroom.

DIAGRAM

The diagram below illustrates how this solution effectively integrates the console IP phone, intercom and access control for schools.
